

Ivy Edge Research Program for High School Students

What is the Ivy Edge Research Program?

An online mentorship program that helps students turn their intellectual interests into unique research projects.

We pair students with PhD-level mentors to design experiments, build robots, create podcasts, submit for publication in peer-reviewed journals and more in all fields from the Humanities to STEM.

What is Independent Research?

Independent Research is a way for students to...

Find Their Spark

Explore a topic that truly excites you and connect with a mentor over a shared passion

Take Agency Over Their Learning

Choose your own topic, set your own schedule, decide how you want to showcase your work

Gain Real-World Skills

Learn college-level research, writing, and communication skills; grow your confidence in yourself

Create Something Real

Finish with a tangible outcome that can be shared in journals, at competition, conferences

Write in the chat:
**What topic are you/your
student interested in
researching?**

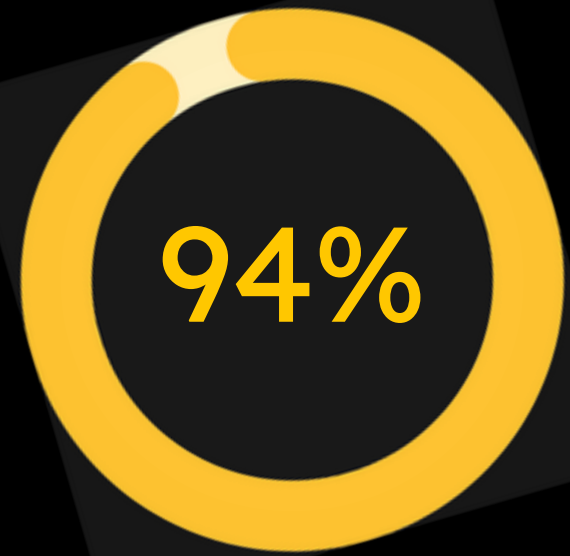

Near-Peer Mentorship

Near-Peer Mentorship is an important part of the Ivy Edge Research experience. Mentors that have recently been in their students' shoes are able to give more relevant advice, connect over shared experiences, and provide a more comfortable setting to ask questions and make mistakes. We are able to find the perfect right for every student.

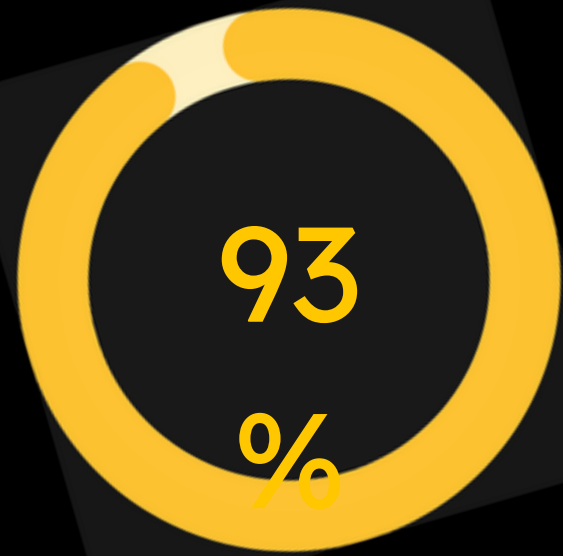

Future Preparedness

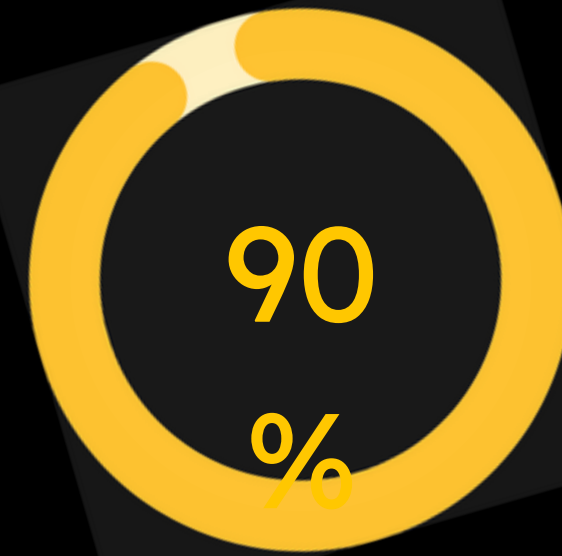

Our alumni report being more prepared to tackle challenges and succeed once they arrive at college. The skills they learn are also valued once they move on to graduate school, internships, and careers.

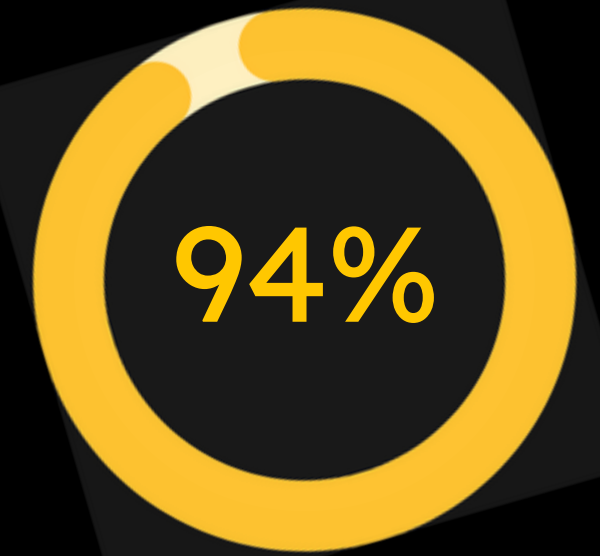

Say their Ivy Edge experience taught them how to work independently and set their own goals

Say their Ivy Edge experience taught them time management and organization skills

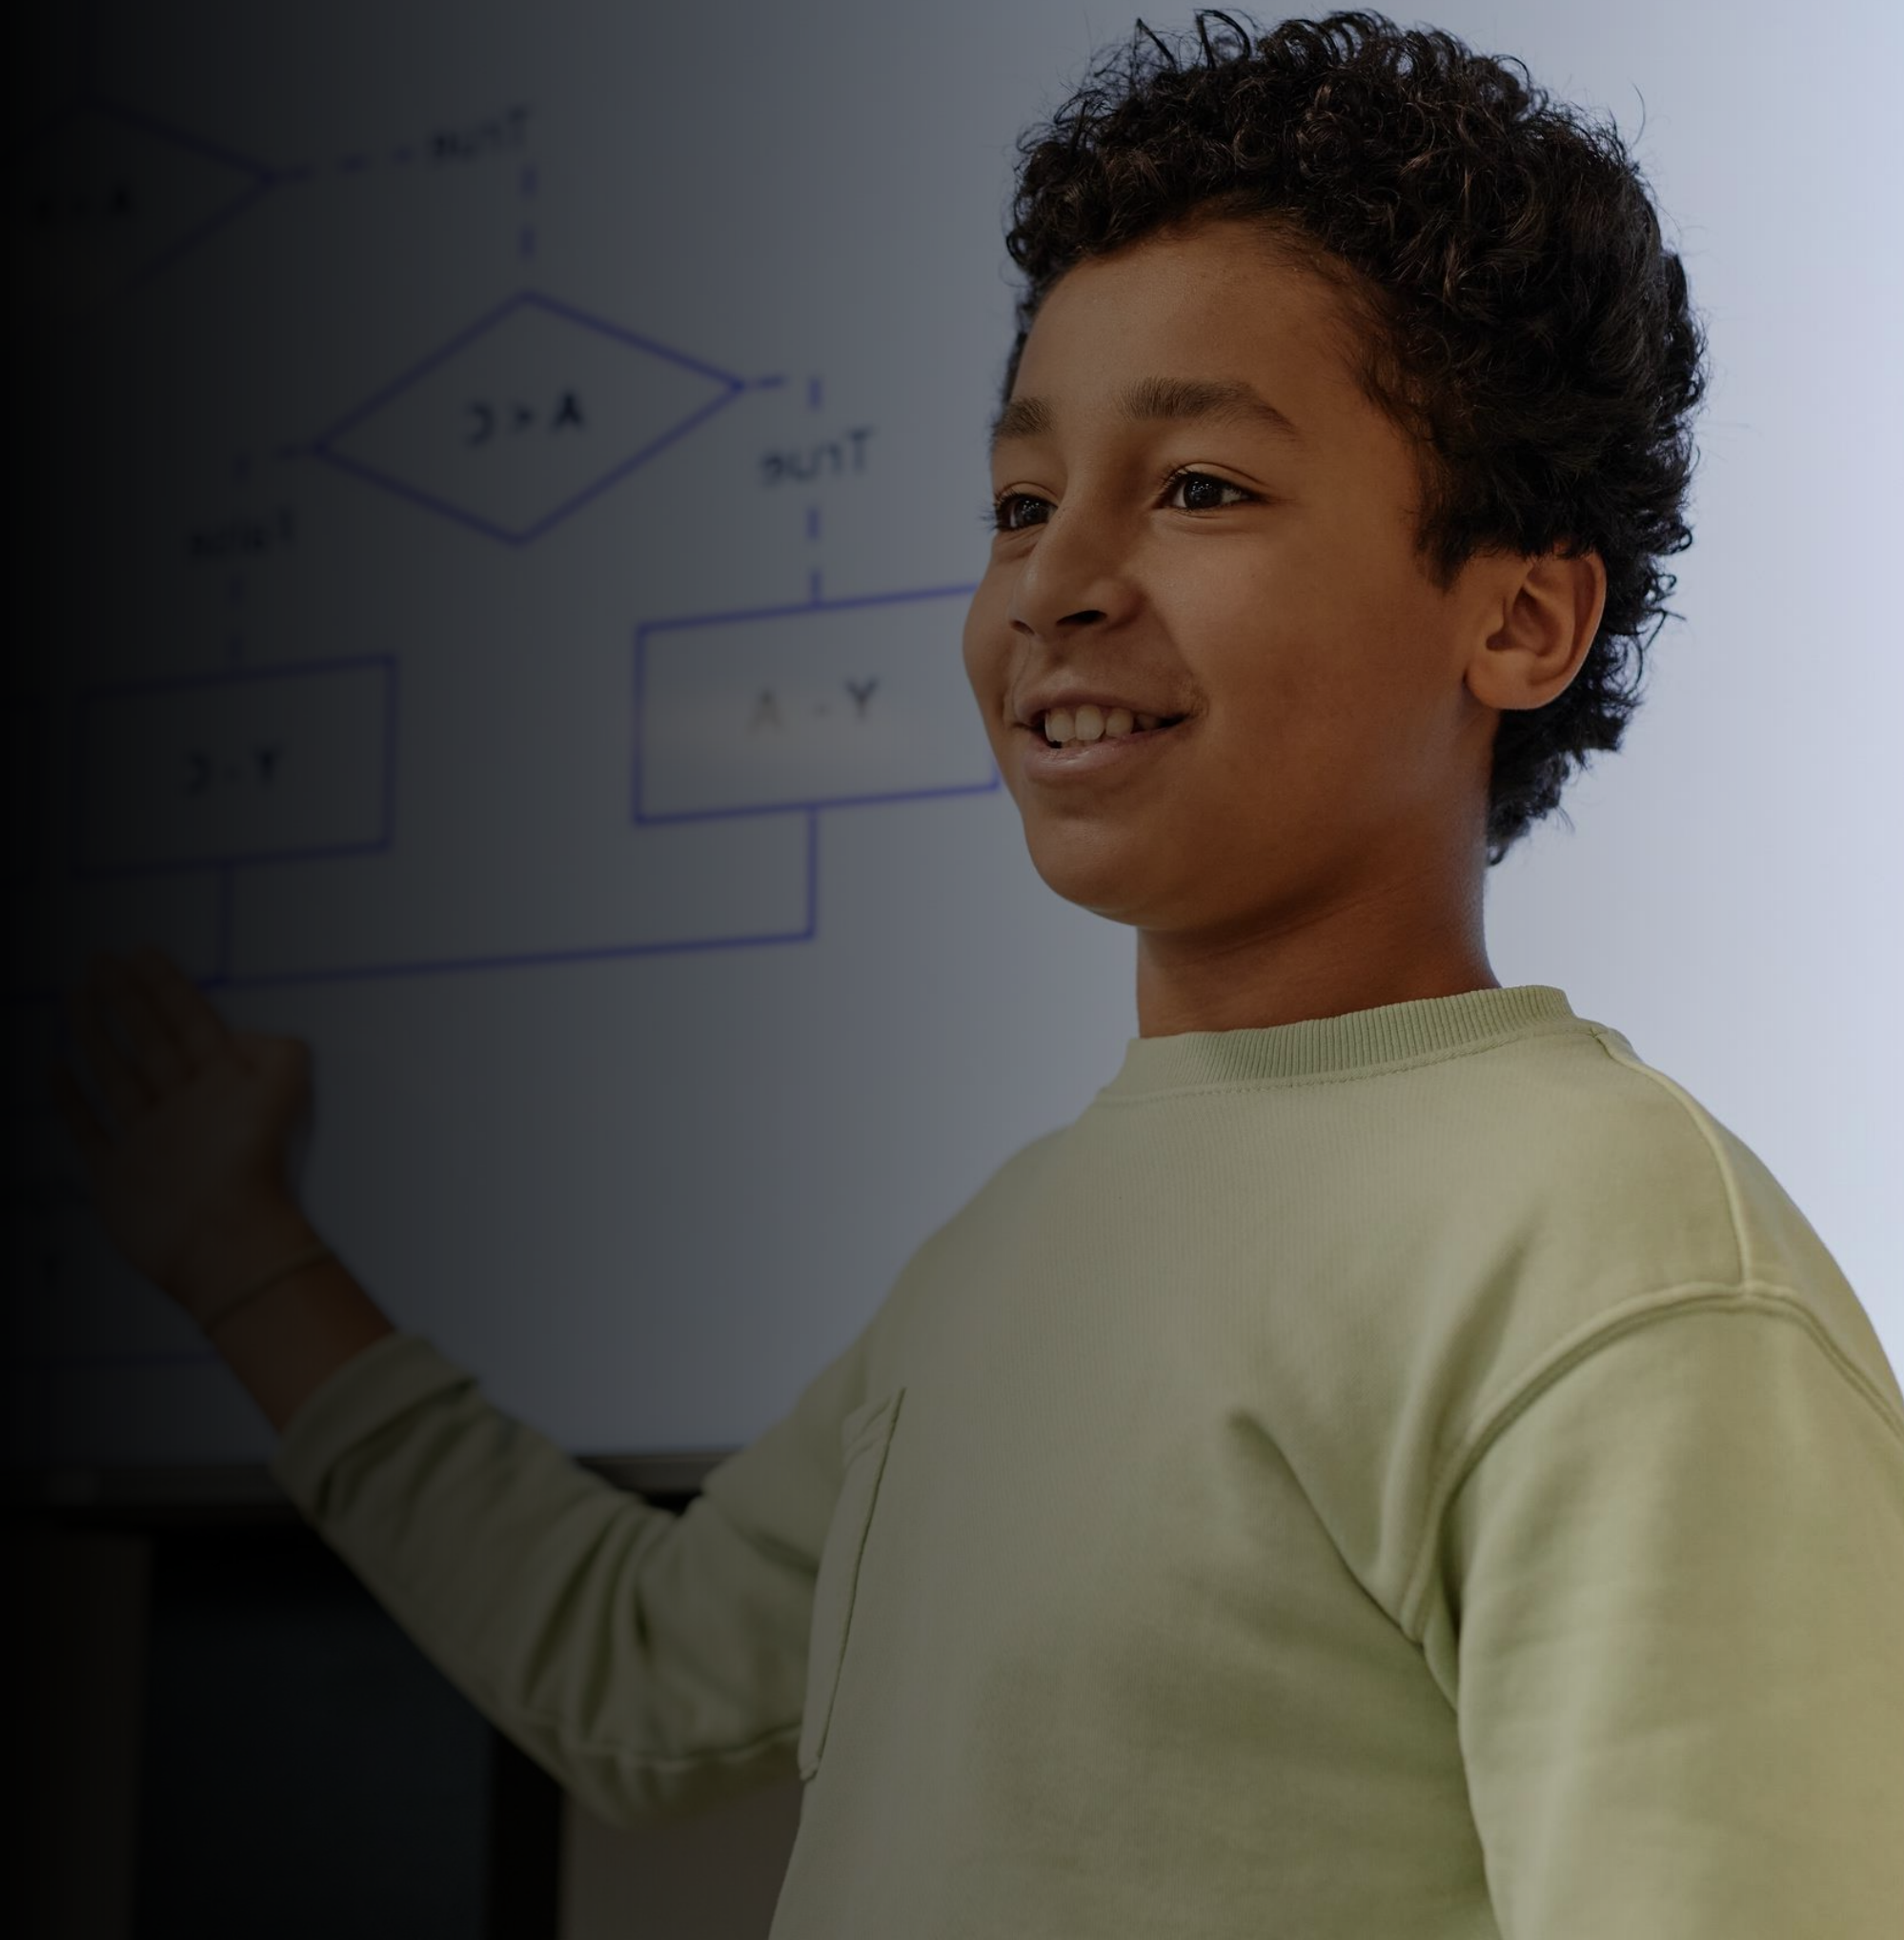

Say their Ivy Edge experience prepared them for college-level writing

Say their Ivy Edge experience prepared them for college-level academic discussions

Projects & Showcasing

What can you do with your research?

PUBLISHING

Students who write research papers can submit their work to a journal for consideration to publish.

Various types of journals exist— pre-print & peer-reviewed are the most common.

COMPETING

Competitions like Science Fairs, Entrepreneurship Challenges, Computer Science Leagues, Writing Awards, and History Day contests are great for showcasing research.

PRESENTING

Students can also present their work publicly at symposiums and conferences, and even privately in college & internship interviews.

MULTIMEDIA

Some research projects need visuals or even audio to make an impact. Students can turn their work into a podcast, a documentary film, website, game or mobile app.

Choosing the Right Showcasing Outlet

Use our Showcasing Database! The database is accesible to all enrolled students.

Showcasing Database

You've spent months developing and revising your project - it's time to share it with the world! Search our database for opportunities to showcase your research paper, art work, or any student project you've been working on. All options are relevant for high school students looking for a chance to share their work with a wider audience, including experts in their topic of interest.

The Research Archive of Rising Scholars is a preprint server for student work, making it a great fit for students also submitting to a journal. Students who showcase their work on The Archive can decide at any point to submit their work to other journals or competitions for consideration. The two are not mutually exclusive. The

Ivy Edge Research Programs

Ivy Edge Research Program

- 10 one-on-one sessions with mentor
- Self-paced, 3-6 months on average
- Work towards project outcome

Launchpad Add-On

3 session with 3 mentors to provide support on project feasibility, style, length (and showcasing options)

Scheduling & Timeline

Flexible Scheduling: Students choose when to meet with their mentors and the pace of their project.

Project Timeline: Projects usually last around 3 and 6 months

When is the best time to start a project?

Many choose to do a project during their sophomore or junior year, but there are also students who do projects earlier in high school and in middle school, or even college. It depends on the student and their goals.

Schedule a call with our Admissions Team to discuss your individual goals - email us at ivyedge-students@research-project.com to be connected with an admissions advisor.
